Styling Kit

Front & Rear skid plates and door moldings

The styling offer consists of a rear and a front skid plate as well as lower door moldings. Together, the styling elements in the exterior styling kit give your vehicle a more expressive design. All three components have parts in brushed stainless steel, which reinforces the vehicle's premium look.

Skid plate, front bumper. A styling element for the front of the vehicle that reinforces your vehicle's powerful appearance and gives it a dynamic and more robust look.

Skid plate, rear bumper. With this styling element, you can reinforce the visual impression for the vehicle's rear section as well.

Door moldings. This element reinforces the vehicle's luxurious impression. The door moldings also accentuate the SUV character and bind together the wholeness of the design.

Floor mats

Plastic

Floor mats, including tunnel mat, for the passenger compartment floor. The mats give an impression of rubber, but are produced in plastic. They have raised surrounding edges, which provide effective protection against wetness and dirt for the car's interior.

The mats smoothly follow the structure of the floor and are designed in a functional pattern. The driver's mat has a comfortable textile foot plate that protects shoes against wear.

Both the mats' color and shape are matched to harmonize with the car's interior.

The mats are easy to install and seal tight against the floor. The front mats are fixed with integrated clips through leak-protected installation holes. The mats can be easily removed for cleaning and can be rinsed off with water.

Kit of five mats, four floor mats & one tunnel mat

Order Code : F2

Cargo mat

Textile and reversible

A high quality, foldable and reversible protective mat. The mat is waterproof with tufted fabric on one side and plastic on the other.

The mat has an integrated practical dirt cover that can be folded down over the bumper. This prevents clothing becoming dirty and protects the bumper when loading and unloading.

When the rear seat is folded, the mat can simply be folded out of the way to protect the rear seat backrests during transportation.

The mat has an attractive design with a surrounding edging strip. The textile is colour-matched to the rest of the interior.

Cargo mat, textile

Order Code : AY

Cargo mat

Plastic

An attractive plastic protective mat that is adapted to fit the load compartment and color matched to the rest of the interior.

To prevent the load from sliding around during transportation, the mat is coated with a layer of friction increasing material.

The mat also has raised edges that prevent dirt and water from leaking out into the load compartment.

Cargo net

Steel

A practical protective grille that prevents loads or pets from being thrown forward into the passenger compartment in the event of heavy braking or a collision.

The grille is easy to install and remove in the prepared mounting points. If more space is required, the grille can be folded up to the ceiling and the rear seat rests folded down.

The second row of seats can be tilted as usual, even with the grille installed.

The grille is thoroughly tested by Volvo and meets all safety and legal requirements.

Comfort pillow

Charcoal

Volvo's neck cushion provides comfortable support for the head thanks to its soft materials and high moldability.

The neck cushion consists of a textile covered visco-elastic foam that molds to the contours of your neck. For passengers who are resting or sleeping the neck cushion contributes to comfort as it helps keep the head steady.

The neck cushion is offered in two different versions, in a wool fabric and in a nubuck fabric. The wool fabric which consists of 80% wool is a natural material that is soft and strong. Its excellent breathability contributes to the neck cushion feeling both warm and cool depending on the climate. The nubuck fabric is a durable, high quality material. It provides comfortable support thanks to its soft surface.

The neck cushion is easily attached to the seat using an elastic band and fits all the seats in the car. The back of the neck cushion has a zip that makes it easy to remove the cover for cleaning and airing.

Sunshade

Front windscreen

With a sunshade in the windscreen, your car will maintain a cooler temperature on hot days. The sunshade helps to prevent the sun from heating up the interior, maintains both the air and the interior at a more comfortable temperature on hot days. By protecting your car from direct sunlight, the sunshade also helps to preserve the car's interior colors.

The sunshade has a stylish design and is a very good fit for your car. You can easily install it on the inside of the windscreen and it is secured by the car's sun visors.

When the sunshade is not in use, it is easy to take off, fold up and store in the supplied bag. The sunshade meets Volvo's quality requirements and retains its shape and rigidity after use.

Child seat

Child booster cushion and backrest

This accessory ensures that your child has a safe and secure car trip. Used together with the standard seat belt, it gives the belt the correct contact with the child's body to provide the best capture in the event of a collision. In addition, the child is higher up and has a better view. For children between 15 kg and 36 kg (33-80 lbs), approx. 3-10 years old. Volvo recommends that your child sits facing backwards in the car to at least 3-4 years of age. The angle of the backrest can be adjusted to two different angles to give your child a more comfortable sleeping position and has five heights positions. For the safest placement of a child in the car, see the car's owner's manual.

Tow bar

Trailer hitch

A towing device especially developed for the North American market. It is easy to remove the ball section by removing a pin. This makes room for Volvo's tow hitch mounted accessories.

Each Volvo tow bar has been designed for your Volvo. They are an integral part of the car's body and have been tested to ensure that they meet the most stringent safety and function demands.

The tow bar is equipped with Volvo's Trailer Stability Assist-technology (TSA) and interacts with your Volvo's DSTC-system¹. If the trailer starts to sway back and forth at speeds in excess of 30 mph (50 km/h), TSA can brake one or more wheels to regain stability and maintain control.

The tow bar consists of three main parts: crossmember, ball holder and a 2" diameter ball. The car is prepared for installation in the bodywork. The tow bar comes complete and ready to be installed.

The tow bar is treated in several stages to provide the best protection for corrosion resistance. The trailer module manages the electronic communication between the vehicle and trailer.

Load carrier

Wing profile for rails

A high quality load carrier for safe and secure transportation of roof loads. The aerodynamically shaped wing profile has been optimised to give minimal air resistance and wind noise, which makes the car journey more comfortable.

The load carrier makes it quick and easy to install Volvo's roof boxes, bicycle holder and cradle for sports equipment. Together with the integrated torque wrench it can be easily adjusted for correct fastening, which gives increased safety and security.

It is easy to install and remove.

Load Carrier

Order Code : RG

Bicycle holder

Frame mounted

A frame mounted bicycle holder with modern dynamic design. For safe transportation and flexible attachment, your bike is secured automatically.

The torque limiting knob controls the torque that the bicycle frame is subjected to and clearly shows if attachment is correct. Its frame and wheel holders position the bike automatically when you attach it.

Thanks to a sturdy grapple the bike can stand securely upright and thanks to the soft padding the risk of damage to the frame is reduced. The bicycle holder is equipped with adjustable diagonal quick release straps that are adjusted according to the bike's tyre width.

The bicycle holder is installed using T-track adapters directly on the load carrier, which means that no tools are required. Locking and adjustment can be performed comfortably at the roof height of the car.

The double lock function secures the bikes as well as the bicycle holder to the car.

NOTE: Only in combination with load carrier

Extra Key

With remote control

Remote control

The wide upper and lower surfaces are clean, without any buttons – just a large Volvo-symbol on the upper side. Buttons in aluminum finish are discreetly integrated on the sides – for locking and unlocking the doors and one for the tailgate on one side and a button for the panic alarm on the other side.

At the upper end is a specially designed key fob holder.

Emergency metal key blade is included (hidden inside the remote control)

The remote control for the Inscription variant is clad in leather in the same color as the upholstery and the R-Design remote control is clad in black perforated nappa leather.

Lockable bolt kit

Lockable wheel bolt kit

Lockable wheel bolts specially developed for Volvo Cars, which gives improved safety. The lock pattern is located against the middle on the lockable bolts and is therefore difficult to reach with a screwdriver, for example. The top of the lockable bolt rotates and is therefore very difficult to loosen without the right wrench. A solid connection between wrench and bolt facilitates installation and removal, and in principle eliminates the risk of crooked tighten, which results in a damaged wrench.

The steel bolts are galvanized and have very good corrosion protection. Together with plastic caps, they provide an attractive appearance that matches the wheel. The design is similar to a standard bolt but sufficiently different to deter potential thieves.

Lockable wheel bolt kit (kit of 4 + key)

Polestar

optimization

Experience the Polestar effect

With more than 20 years racing experience, Polestar is at the forefront when it comes to performance optimization. What we learn from motorsport, we take into the development of new products. The goal is always the same: to offer all Volvo owners an even greater driving experience.

Faster throttle response

Throttle response has been calibrated to respond more quickly to driver commands - something that gives higher precision and better feel.

Faster gear changes

The automatic gearbox changes gears more quickly to both improve acceleration and to better respond to the driver's commands, e.g. downshifts before overtaking.

Better gear precision and gear hold

The gears have also been calibrated to exploit the engine's improved midrange performance. The gearbox also avoids changes when cornering at high G-forces (where possible) for better stability.

Faster gear and engine response

The engine and gearbox have been calibrated to respond more quickly when the driver releases the accelerator. This makes the car more balanced and predictable when cornering for example.

Increased engine performance

We have concentrated the power where it is needed most - in the midrange; perfect for passing on a highway. Combined with faster throttle response and gear changes this makes the car significantly more dynamic to drive.
