MY19 XC90

Polestar

For T5 and T6 AWD (not for T8)

Experience the Polestar effect

With more than 20 years racing experience, Polestar is at the forefront when it comes to performance optimization. What we learn from motorsport, we take into the development of new products. The goal is always the same - to offer all Volvo owners an even greater driving experience.

Faster throttle response

Throttle response has been calibrated to respond more quickly to driver commands - something that gives higher precision and better feel.

Faster gear changes

The automatic gearbox changes gears more quickly to both improve acceleration and to better respond to the driver's commands, e.g. downshifts before overtaking.

Better gear precision and gear hold

The gears have also been calibrated to exploit the engine's improved midrange performance. The gearbox also avoids changes when cornering at high g-forces (where possible) for better stability.

Faster gear and engine response

The engine and gearbox have been calibrated to respond more quickly when the driver releases the accelerator. This makes the car more balanced and predictable when cornering for example.

Increased engine performance

We have concentrated the power where it is needed most - in the midrange; perfect for passing on a highway. Combined with faster throttle response and gear changes this makes the car significantly more dynamic to drive.

Floor mats

Plastic

Floor mats for the passenger compartment floor, including a tunnel mat. The mats are made of soft and flexible plastic, with a feeling of rubber. They have raised edges all around, and give effective protection for the car's interior against wet and dirt. The material is rugged and designed in a pattern with soft edges and radii. The driver's mat has a comfortable textile foot plate that protects the shoes from wear. Both the mats' color and shape are matched to make them seem integrated with the car's interior. The mats are easy to install and seal tight against the floor. They are held in place with integrated clips through leak-protected installation holes, and can easily be removed and rinsed off with water.

5- and 7-seater (set of five mats)

Running boards

Integrated with illumination

An exclusive and stylish running board that enhances the luxurious appearance of the car. The running boards will simplify getting in and out of the car and when loading the roof. The running boards have LED illumination strips on the outer edge that both indicate where to put the foot and give the car a cool and high-tech appearance. Light coordinated with interior light logic1 . To reduce the risk to slip on the top surface, rubber inserts are integrated in the metal part. The running boards are mainly made of strong aluminum to achieve high strength and lowest possible weight and will withstand a weight of 300 kg. Available in all exterior body colors, with brushed stainless steel steps. Replaces the standard mounted sill moldings.

Bumper cover

Load protector

An exclusive load protection in brushed stainless steel for the rear bumper. A practical and attractive accessory to avoid scratching the paint when loading and unloading the load compartment.

Bumper Cover

USD

150

Order Code : A01015

Sun shades

For rear doors and cargo area

Full-cover sun shades that provide maximum protection for your passengers when the sun is bright and irritating. Not only do they effectively protect against heat and irritation from sunlight, they also give the car a stylish look similar to tinted windows.

The sun shades are uniquely tailored to the rear windows of your car, providing a more comfortable trip in strong sunlight.

If the rear side windows need to be lowered during a journey, the sun shades minimize the wind "booming noise" that can arise. When the sun shades are not used, they can be stored in the supplied bag.

Facts and Advantages

- Easy to install and uninstall.
- Remain in place when the windows are lowered (not recommended at speeds above 90 km/h (55 mph) as there is a risk that the sunshade can work loose).

Cargo mat

Textile and reversible

A protective mat made of high-quality textile and plastic. It is available in two versions: a single-piece mat for cars seating 5 and a two-piece mat for cars seating 7. The 7-seater mat can be used when the third row of seats is either upright or folded down, as the front half can simply be removed from the car. The mat has a practical integrated dirt cover for bumper protection. It protects both the bumper and the clothes from getting dirty when loading and unloading

Dirt Cover

Fully covering

A practical protector for the load compartment that covers the floor and side walls of the load compartment plus the rear of the rear seats. Made from durable, dirt-resistant vinyl.

Gives very effective and fully covering protection of the load compartment when carrying dirty loads. The protection has an integrated dirt cover that can be folded down over the bumper. It prevents clothing from becoming dirty and protects the bumper when loading and unloading.

The backrest part of the protection can be divided in two places via zips, so that the rear backrests can be folded independently of each other. The protector also has different practical pockets on the sides, a net pocket and a pocket with zip.

The load compartment protector is easy to use and is simple to secure and remove. It is secured using elastic straps around the head restraints and with press-studs, which are secured to the side panel.

Dirt cover

Protective grille

Steel

A practical protective grille that prevents loads or pets from being thrown forward into the passenger compartment in the event of heavy braking or collision. The grille is simple to install and remove in the prepared fixation points. It cannot be raised up to the roof, and must therefore be removed from the car when not needed. The grille is fully tested and meets all safety and legal requirements

Note: The protective grille must not be mounted when the third row of seats is in use.

Protective grille, steel

Order Code : A00189

Cargo Divider

Steel

The longitudinal divider enables you to separate the load compartment and so have two load compartments in one. Installed together with the protective steel grille, the divider allows for either two pets or a combination of a pet on one side and items such as luggage on the other. The divider is fully tested and is designed so as not to penetrate the passenger compartment in the event of collision.

Note: Can only be ordered in comb. with protective grille (Order code A00189)

Cargo divider, Steel

Order Code : A00056

Dog Gate

The dog gate is a very practical accessory for dog owners, keeping the dog both safe and secure while travelling. It also helps and prevents the dog from jumping out from the car when the tailgate is opened. One or two dog compartments can be created in combination with the protective grille and load compartment divider, with a gate mounted on the right or left side or on both sides. The gate is very easy to open, close and remove from the car.

Note: Can only be ordered in combination with protective grille and Cargo Divider

Dog gate, Steel (Right)

Comfort pillow

Nubuck leather, charcoal

Volvo's neck cushion provides comfortable support for the head thanks to its soft materials and high moldability. The neck cushion consists of a textile-covered foam that molds to the contours of your neck. For passengers who are resting, the neck cushion contributes to comfort as it helps keep the head steady.

The nubuck leather is a durable, high quality material. It provides comfortable support thanks to its soft surface.

The neck cushion is easily attached to the seat using an elastic band and fits all the seats in the car. The back of the neck cushion includes a zipper for ease of removal for cleaning.

Tow bar

Trailer hitch

A tow hitch especially designed for the North American market. With the simple removal of a pin, the ball holder is very easy to remove to enable mounting of hitch-mounted accessories.

The tow hitch consists of three main components:

Crossmember, ball holder and a ball with a diameter of 2".

The vehicle bodywork is prepared for installation. To provide the best protection from corrosion the tow bar has undergone multi-layer corrosion treatment. The tow ball is zinc-nickel coated.

For high strength and tow weight rating, the tow bar is manufactured with conventional welding.

Load carrier

For integrated rails

A high quality load carrier for safe and secure transportation of roof loads. The aerodynamically shaped wing profile has been optimized to give minimal air resistance and wind noise, which makes the car journey more comfortable. The load carrier makes it quick and easy to install Volvo's roof boxes, bicycle holder and cradle for sports equipment. Together with the integrated torque wrench, it can be easily adjusted for correct fastening, which gives increased safety and security. It is easy to install and remove.

Facts and advantages

- Attractive Volvo design.
- Aerodynamic wing profile with T-track.
- Can be installed on vehicles with roof rails.
- All Volvo's loading accessories are suitable. However, some loading accessories require T-track adaptation.
- Volvo marked.
- Lock included (including four keys).

Key fob shell

Wood

Choose between two high-quality, luxuriously designed wooden key fob shells that tastefully match the interior of the car. Key fob shells make your key more decorative and harmonize with the car's Scandinavian heritage.

Wood veneers are hand-picked and carefully selected to find the material best suited to you. The natural texture, color and grain of the wood gives each key fob shell a unique look. Each key fob shell is therefore exclusive. The key fob shell is made by hand with great care and precision. You can change shell yourself or your dealer can assist you.

Choose between two attractive wood versions, with different nuances and structure:

Dark Flame Birch made of birch and has a classic dark appearance with a luxurious high gloss finish.

Linear Walnut made of walnut wood with a more modern look where the wood's texture and authenticity can be felt.

Red key

A key for car owners who want the car to be driven responsibly even when someone else is driving it. Red Key helps, for example, parents to encourage young adults to drive responsibly. It also means that you can feel assured when you use valet parking or leave your car at a workshop. The following settings can be made:

- Restricted top speed. 120 km/h (75 mph) is preset.1
- Cruise control, adaptive. The longest interval to the vehicle in front is preset.2
- Speed warning. 50, 70 and 90 km/h (30, 45, and 55 mph) is preset.3
- Restricted sound level. The volume has a restricted level, which is either on or off. Restricted sound level is preset.

The car's safety functions are always on, which can include the following functions depending on which safety functions the car is equipped with:

- BLIS (Blind Spot Information System).
- Lane Keeping Aid and Lane Departure Warning.
- Forward Collision Warning.
- Driver Alert Control.
- Distance Alert.
- Traffic Sign Recognition.

Red key (1 piece)

Lockable bolt

Lockable wheel bolt kit

Lockable wheel bolts specially developed for Volvo Cars, which gives improved safety.

The lock pattern is located against the middle on the lockable bolts and is therefore difficult to reach with a screwdriver, for example. The top of the lockable bolt rotates and is therefore very difficult to loosen without the right wrench. A solid connection between wrench and bolt facilitates installation and removal, and in principle eliminates the risk of crooked tighten, which results in a damaged wrench.

The bolts have very good rust protection. The design is like a standard bolt but different enough to deter any thieves.

Volvo chromed lug bolts are developed to match Volvo's aluminum wheel rims. With their discreet and exclusive design, they constitute a well-integrated part of the wheel area.

Lockable wheel bolt kit (set of 4 + key)
